

Nihildev Nandakumar

Berlin, Germany | +49 152 2789 2939 | nihildev.nandakumar@gmail.com | nihildev.eu.cc

PROFESSIONAL SUMMARY

Technology executive and AI engineering leader with **7+ years** shipping production AI/ML systems that deliver board-level outcomes — from a **€500K seed close** to **100K+ AI evaluations/day** at sub-second latency. Published researcher (LREC-COLING 2024) and hands-on technical architect who builds full engineering organisations from zero, turns data infrastructure into durable competitive advantage, and communicates at the level of investors, executives, and engineers alike. Deep expertise across the full AI stack: from embedding pipelines and agentic LLM orchestration to cloud-native infrastructure, real-time data platforms, and full-stack product delivery in Python, TypeScript, and FastAPI. Proven track record of accelerating development velocity through AI-assisted workflows, owning end-to-end technical strategy, and translating complex engineering decisions into clear business outcomes.

CORE COMPETENCIES

AI/ML Strategy & Architecture	LLM & Agentic AI Systems	Full-Stack Platform Development
Data Platform Architecture	Cloud Infrastructure (AWS, GCP)	Executive Stakeholder Communication
Team Building & Eng. Culture	Fundraising & Investor Engagement	Research & Thought Leadership

TECHNICAL SKILLS

AI & Machine Learning: LLMs, CrewAI, LangChain, embeddings, vector search, multi-context prompting, agentic systems, OpenAI API, pgvector/ANN, RAG pipelines, PyTorch, TensorFlow, NLP (spaCy, HuggingFace), Differential Privacy, MCP Servers

AI-Assisted Development: GitHub Copilot, Cursor, Claude Code, AI-first workflows, context engineering, n8n automation

Backend & APIs: Python, FastAPI, Node.js, TypeScript, REST APIs, Redis/BullMQ, PostgreSQL, Supabase, SQLAlchemy, Pydantic

Frontend: React, Next.js (App Router), TypeScript, JavaScript, TailwindCSS, Zustand, TanStack Query, D3.js

Data Engineering: dbt, Dagster, Apache Kafka, dlt, BigQuery, GCP Dataform, Metabase, Tableau, Power BI, Looker

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch), GCP, Docker, GitHub Actions (CI/CD), Infrastructure as Code, Railway

Analytics & Tracking: GA4, GTM (server-side), Amplitude, Google Ads, Microsoft Ads

Languages: English (C2, Fluent) • German (B1, Professional Working) • Tamil (Native)

PROFESSIONAL EXPERIENCE

PLACED

Founding Engineer

Berlin, Germany

Apr 2025 – Dec 2025

Seed-stage AI talent-matching startup (backed €500K). Sole technical hire — built the engineering organisation, architecture, and product from Day 0.

- **Technical Organisation:** Established the full engineering structure, infrastructure, and development culture independently as the sole technical leader; owned all technology strategy and hiring decisions.
- **Rapid Delivery:** Directed AI-first development using GitHub Copilot and Cursor, shipping a production platform in **50 days** and onboarding **1,000+ early adopters**.
- **LLM Architecture:** Designed a multi-context agentic matching pipeline sustaining **100K+ evaluations/day at sub-second latency** — the core technical differentiator presented in all investor sessions.
- **Seed Funding:** Led every investor technical session and live demonstration, directly enabling the **€500K seed close**.
- **Engineering Excellence:** Established CI/CD and infrastructure-as-code from scratch, reducing deployment errors by **90%** and setting a repeatable release cadence.

Asgoodasnew Electronics GmbH

Web & Data Analytics Specialist

Berlin, Germany

Nov 2023 – Jan 2025

- **ML Pricing Intelligence:** Designed and deployed ML-based competitor price monitoring, delivering a **12% margin improvement** and eliminating **80%** of manual analytics overhead.
- **Data Infrastructure:** Directed migration to GCP Dataform ELT architecture — **50% faster** pipelines at **20% lower cost**; introduced A/B experimentation capability that drove measurable conversion uplift.

- **Measurement Governance:** Implemented server-side GTM tracking raising event accuracy by **40%**, enabling reliable multi-channel attribution for commercial decision-making.

Infinion Technologies AG

Data Analyst

Munich, Germany

Dec 2019 – Sep 2023

- **AI Platform Delivery:** Built and deployed enterprise NLP sentiment model (**95% accuracy**), eliminating **80%** of manual feedback classification across the organisation.
- **Executive Intelligence:** Delivered 30+ Tableau dashboards for 100+ senior stakeholders, generating **€100K in annual savings**; awarded the **#oneSAP Team Award** for strategic business impact.
- **Revenue Analytics:** Predictive sales models expanded profitable customer segments by **15%**, directly informing commercial strategy at the C-suite level.

SportsMechanics India Pvt Ltd

Software Engineer

Chennai, India

Sep 2017 – Mar 2019

- **Platform Engineering:** Spearheaded modernisation of 10+ sports-tech client platforms to MERN stack, reducing total cost of ownership by **30%** and accelerating feature delivery velocity.
- **Real-Time Analytics:** Architected live IPL cricket data pipelines and interactive dashboards, cutting processing latency by **50%** and delivering in-play operational insights to league management.

Tribal Mountain Co.

Founder & Technical Lead

Remote

Jun 2018 – Present

- Founded and scaled a bootstrapped DTC brand end-to-end — sole owner of all commercial, operational, and technical decisions from concept to revenue.
- Architected AI-driven demand forecasting and inventory optimisation system, reducing supply chain waste by **25%** and improving stock-level accuracy.

EDUCATION

M.Sc. Informatics — Artificial Intelligence & Machine Learning Technical University of Munich | 2019–2023

GPA: 2.0 (German scale, Very Good) | Specialisation: NLP, ML, AI, Software Engineering, Business Analytics

Thesis: “*Local Differential Privacy in NLP*” — peer-reviewed and published at LREC-COLING 2024

B.Tech Computer Science

SRM University, Chennai | 2013–2017

GPA: 9.3/10 | First Class with Distinction | Top 5% of graduating class

PUBLICATIONS & THOUGHT LEADERSHIP

Comparative Analysis of Local Differential Privacy in NLP

May 2024

LREC-COLING 2024 — Torino, Italy | aclanthology.org/2024.lrec-main.16

Peer-reviewed research (M.Sc. thesis, TUM) demonstrating **45% improvement** in differential privacy protection in language models while preserving model utility — addressing a core challenge in enterprise AI governance.

AI Agents & Automation Workshop

April 2025

International Showtimes, Europe — 30+ Engineers & Developers

Designed and delivered a full-day workshop on LLM orchestration, agentic AI, prompt and context engineering, and no-code automation (n8n). Guided cross-functional teams in identifying automation opportunities and establishing best practices for responsible AI adoption.

SELECTED PROJECTS

Job Pipeline AI

nihildev.eu.cc

End-to-end AI job application platform: 15+ portals scraped in parallel, pgvector hybrid retrieval, GPT-4o CV optimiser, Playwright auto-apply engine, real-time Next.js dashboard with live status tracking.

Stack: Next.js 16, FastAPI, Supabase, pgvector, Redis/BullMQ, Docker, OpenAI GPT-4o.

DataMCP — Production MCP Server

Full-stack data engineering MCP server giving AI coding assistants schema introspection, dbt model generation, Metabase, Dagster orchestration, and Kafka access. 20 tools, 232 tests.

Stack: Python, FastMCP, dbt, Dagster, Apache Kafka, Metabase, dlt, Jinja2.
